

287. IMPLEMENTATION OF INFORMATION COMMUNICATION TECHNIQUES IN CRITICAL SCENARIOS

Pradyumn Jain¹, Gaurav Kumar² and Souradeep Paul³ Department of Information and Telecommunication Engineering, SRM University, Chennai E-mail ID: ³paul07091993@gmail.com, ²kgaurav259@yahoo.in, ¹jnpradyumn@gmail.com

In today's modern era, development of nations and individuals are becoming increasingly dependent on the information communication system as they continue to evolve rapidly. This paper begins with the analysis of techniques used in different situation such as underwater, underground, isolated islands, vehicle safety, health care and in rural areas. Then based on the analysis and the summarization of the current researchers, the best economical and effective techniques are discussed in this paper. This paper provides an overview on a set of techniques which can be implemented over a particular areas according to the requirements.
